**A warm welcome from the new machinery team**

Dear Sirs,

maybe you have been informed by our "old" bauku Troisdorfer Bau- und Kunststoff GmbH, that the company is restructured and is divided into a machinery company for the international business and a pipe system company for the national business in Germany.

Today we have the pleasure to introduce ourselves as the new machinery company of the bauku family, combining a tradition in machinery business since 1956 with a new innovative company concept and a team of technicians and engineers, just dedicated to the international customers.

Mr. Marcus Hawerkamp, the general manager of bauku since more than 30 years and the holder of various patents and IPR's is the owner and general manager of the new company, which is the guarantee for the available knowhow for all our business friends.

The new machinery team is looking forward to meet you in the near future and we will be pleased to answer all questions, which may rise up regarding the changes at bauku and of course we would be delighted, to serve you with new quotations for complete machineries, spare parts or services.

With friendly regards

**Hawerkamp Maschinenbau  
und Kunststoffrohr GmbH & Co. KG**

  
Dipl.-Ing. Marcus Hawerkamp  
general manager
